

Detcord Loop Booster™

The Detcord Loop Booster™ is an ingenious booster that provides a convenient and highly reliable method of initiating charges with a single loop of detonating cord packed with plastic explosive.

With a low profile and a matchbox design, it is an excellent alternative to traditional knots or slip in boosters. The Detcord Loop Booster™ features a M14 thread allowing it to be connected to many of the Alford charges allowing multiple charges to be interconnected with detonating cord for simultaneous initiation.

Specifications

Dimensions	39mm length x 25mm width 13mm depth
Contents	20 per pack
Weight	5g
Colour	Grey
Part No.	DB1901
