

EOD Dioplex™

DIOPLEX EOD™ is a user-filled, linear cutting charge designed for Explosive Ordnance Disposal Operations, and offers a similar capability the US Mk7 (mod 1-8) Demolition Charge Containers recommended for use in US 60 Series and other NATO Render Safe Procedures.

The charges can be used with most military and commercial plastic explosives and initiation system. They are non-magnetic and can be used in shallow water, offering the operator an enhanced EOD capability.

Available in two charge sizes: 10mm and 15mm versions.

Each charge 150mm long and can be connected together to create longer lengths if required.

Loaded with standard Plastic Explosives and initiated by equivalent detonators or Shock tube.

Both sizes available in packs of 10 charges per pentapod.

Features include:

- > Individual lengths may be connected end-to-end with reliable initiation of all charges
- > User Filled, quick and easy to load with a low NEQ
- > Powerful and efficient explosive effect
- > Available in two sizes
- > Can be stored and carried inert with no restrictions, and loaded onsite for use

Configuration

Can be used individually, cut to required length, or joined together to create longer cutting lengths as required.

Application

Dioplex EOD™ can be used against most EOD items including air dropped munitions, artillery shells and rocket bodies.

EOD™ Dioplex with lid removed

Specifications

Product Series	NEQ	PERFORMANCE (S275 Mild Steel)
DXE 10mm	25g	8mm max cut.
DXE 15mm	50g	14mm max cut
