

Vulcan Counter-Limpet Mine System™

The Vulcan Counter-Limpet Mine System (VCLMS)™ is based on the highly renowned Vulcan™. It is a highly versatile user-filled shaped charge system used against a wide variety of Unexploded Ordnance (UXO). When used underwater, the VCLMS is fitted with an air Stand-off Capsule which ensures the correct stand-off distance and allows the projectile to form within the capsule. VCLMS can be initiated using detonators or can be linked together using det cord boosters and detonating cord.

The VCLMS offers an EOD Dive Team a complete modular weapon stand system that can be adapted to suit a variety of target vessel or seabed conditions. The lightweight and modular weapon stand offers a quick and reliable method of deploying multiple Vulcan™ EOD tools in a single dive.

Features include:

- > Integral to one of the five-eyes Navy establishments
- > Multi-role explosive charge tool
- > Lightweight & easy to configure
- > Can be used on land & underwater

The Vulcan Counter-Limpet Mine System (VCLMS)[™] is provided as a comprehensive kit which includes all accessory packs, or can be purchased as a Tool Roll Set to replace charges as they are consumed. Accessory packs can be bought to support more EOD/CMD tasks.

Vulcan Counter-Limpet Mine System[™] – Complete System

The VCLMS Complete System provides enough equipment to support an EOD Team for multiple missions. It includes 5 VCLMS Tool Roll Sets[™] & multiples of all accessory packs. It provides the basic kit for an EOD Team dealing with underwater threats. This kit can be replenished as stocks are consumed. It is provided in a robust Pelicase. Replacement charges can be purchased as they are consumed (see VCLMS Charge & Stand Assembly).

Contents: 5 VCLMS Tool Roll Sets, 1 VCLMS Cable Reel Set, 1 VCLMS Accessory Pack 2, 1 VCLMS Accessory Pack 3, 1 VCLMS Accessory Pack 4, Supporting Manuals & 1 Pelicase NATO Stock No. (NSN): 1386-99-341-4411

Vulcan Counter-Limpet Mine System[™] – Tool Roll Set

The VCLMS Tool Roll Set[™] is a compact and comprehensive set of equipment which can be carried by hand & used in the field. It can be augmented using the accessory kits. Replacement charges can be purchased as they are consumed (see VCLMS Charge & Stand Assembly).

Contents: 4 charges per pack (incl. 4 magnet sets, 1 Vulcan Projectile Combo Set, 1 loading kit, 1 pack of Mini Detcord Clips, 1 pack PDAs, 1 tool roll and 1 marker pen) NATO Stock No. (NSN): 1386-99-334-5513
